Raymond Resurreccion

Norwalk, CA 90650 | 562-674-0039 | hello@rayresurreccion.com | LinkedIn

SUMMARY

Senior Business Intelligence Analyst with 15+ years of experience delivering enterprise analytics, KPI reporting, executive dashboards, and decision-support solutions across healthcare, finance, and operations. Expert in SQL, Python, Snowflake, Tableau, Power BI, Excel, and statistical analysis, translating complex business requirements and data into actionable insights, and scalable self-service BI solutions.

SKILLS

Business Intelligence & Analytics: Business Intelligence, Business Analysis, KPI Development, Executive Reporting, Operational Analytics, Ad Hoc Analysis, Trend Analysis, Root Cause Analysis, Forecasting, Predictive Analytics, Cohort Analysis, Segmentation, A/B Testing, Data Storytelling
BI & Visualization: Tableau, Power BI, Excel, KPI Dashboards, Executive Dashboards, Self-Service Analytics, Data Visualization, Power Query, Report Automation, Dashboard Development
SQL & Analytics: SQL, T-SQL, PostgreSQL, Python, Pandas, NumPy, Scikit-learn, Statistical Analysis, Regression Analysis, Hypothesis Testing, Time Series Analysis, Data Wrangling, Data Validation
Data & Reporting Platforms: Snowflake, SQL Server, BigQuery, dbt, AWS S3, AWS Glue, Airflow, ETL/ELT, Data Modeling, Dimensional Modeling, Semantic Layer Design, Data Quality, Data Governance
Business & Stakeholder Management: Requirements Gathering, KPI Frameworks, Stakeholder Management, Executive Communication, Cross-Functional Collaboration, Business Requirements Analysis, Strategic Planning, Presentation

EXPERIENCE

Data Engineer Academy **Remote**
Senior Business Intelligence Analyst ***Oct 2025 – Present***

- Analyzed 100K+ lead records using **SQL** and **Close CRM**, identifying source, engagement, pipeline, and follow-up trends to support sales prioritization and improve lead management.
- Analyzed 1,000+ active opportunities using **Excel** and **CRM data**, evaluating funnel movement across qualification, proposal, and conversion stages to identify pipeline gaps.
- Evaluated email, LinkedIn, and outbound campaigns using **Excel** and **campaign data**, comparing engagement and conversion metrics to identify higher-performing outreach strategies.
- Developed sales and marketing KPI dashboards using **Power BI** and **DAX**, giving leadership visibility into lead volume, conversion, campaign performance, and pipeline activity.
- Automated sales and marketing reporting workflows using **Zapier** and **AWS S3**, connecting form submissions, CRM records, and shared datasets to streamline recurring analytics.
- Performed cohort and trend analysis using **Python** and **Pandas**, identifying lead behavior patterns that supported campaign targeting and follow-up recommendations.
- Supported chatbot development using **Python** and **LangChain**, organizing course information and analytical content to improve access to relevant learning resources.
- Partnered with sales, marketing, recruiting, and technology teams through requirements gathering, **stakeholder management**, and **data storytelling** to translate business needs into actionable insights.

PIH Health Inc. **Whittier, CA**
Senior Business Intelligence Analyst ***Mar 2019 - Sep 2025***

- Engineered analytics-ready datasets from **20M+ records** using SQL, Snowflake, and dimensional modeling, creating reliable data foundations for enterprise reporting and operational analytics.
- Built scalable **ELT pipelines** using dbt, SQL, and AWS S3, transforming enterprise source data into governed datasets that shortened reporting delivery cycles.
- Designed reusable **data models and semantic layers** in Snowflake, standardizing business definitions and enabling consistent KPI reporting across Finance, Operations, and Technology.
- Developed interactive **Tableau dashboards** across 40+ operational KPIs, connecting governed datasets to business metrics and improving visibility into enterprise performance.
- Implemented **Data Quality** and Data Governance using **SQL** and **dbt tests**, improving reporting accuracy from 92% to 98% across critical enterprise analytics datasets.
- Optimized complex **SQL queries** across Snowflake, improving data retrieval performance for recurring reporting and high-volume operational analysis.
- Developed **Python** workflows using **Pandas** and **NumPy** for data transformation, statistical analysis, and analytical dataset preparation supporting business intelligence initiatives.
- Built **Self-Service Analytics** solutions using Tableau and governed semantic datasets, enabling business teams to access standardized metrics without recurring manual data preparation.
- Developed **KPI frameworks** and reusable reporting datasets across Finance, Operations, and Technology, creating consistent metric definitions for enterprise performance reporting.

- Partnered with business and technology stakeholders to translate **reporting requirements** into scalable data models, analytical datasets, and BI solutions aligned with operational needs.
- Mentored junior analysts on **SQL and data modeling**, strengthening development practices across recurring analytics, reporting, and business intelligence deliverables.

SD & A Teleservices **Los Angeles, CA**
SQL Developer ***Jun 2015 - Mar 2019***

- Developed and maintained **SQL Server ETL solutions** using **SSIS, Stored Procedures, Views, User-Defined Functions (UDFs), and T-SQL**, integrating customer, sales, and operational data to support enterprise reporting and business analytics.
- Optimized complex **SQL queries** through indexing, execution plan analysis, CTEs, and query performance tuning, improving batch processing performance by **35%** and accelerating reporting across production databases.
- Designed and enhanced **relational database objects** and data transformation logic, improving **data quality, validation, reconciliation, and duplicate detection** for customer and transaction datasets.
- Built and automated SQL-based reporting solutions supporting **KPI reporting, campaign performance analysis, and operational dashboards**, enabling business teams to monitor customer engagement and sales performance.
- Generated and managed outbound dialing campaigns using **MS Access (VBA)** and SQL, producing productivity, penetration, and conversion reports that supported marketing and call center optimization initiatives.
- Collaborated with business analysts and application teams **to gather reporting requirements**, troubleshoot production issues, and deliver scalable SQL solutions supporting day-to-day business operations.

Zenith Education Group **Santa Ana, CA**
Business Analyst ***Apr 2010 - Jun 2015***

- Developed **SQL-based KPI dashboards, ad hoc reports, and automated reporting solutions** using **SQL, VBA, iMacros, and Excel**, analyzing call center performance, agent productivity, service levels, and operational metrics to improve reporting and business efficiency.
- Partnered with business stakeholders to translate business needs into analytical solutions, and deliver **HTML and Excel-based executive reports**, improving visibility into performance trends, vendor operations, and key business KPIs through actionable data insights.

United Health Group **South Gate, CA**
Business Analyst ***Mar 2008 - Sep 2009***

- Developed and optimized **SQL Server stored procedures** for **data cleansing, transformation, aggregation, and reporting**, collaborating with business stakeholders to resolve application issues, improve quality, and support reliable operational reporting and system performance.

Countrywide Financial **Pasadena, CA**
Business Analyst ***Jan 2007 - Dec 2007***

- Designed automated **SQL Server** and **Excel** reporting solutions that delivered productivity metrics, forecasting, trend analysis, and executive reporting to support business operations.

EDUCATION

DeVry University **Long Beach, CA**
Bachelor of Science in **Business Administration with an emphasis on Business Information Systems |** GPA: 3.7 **|** Graduation: June 04
Relevant courses: Managerial Accounting, Managerial Finance, Business Communications, Operations Strategy, Project Management, Total Quality Management, Database Applications

PROJECTS

Hotel Guest Package Tracking at Anaheim Marriott Hotel

- Implemented an Access Database to track packages for guests which included forms with VBA Coding, reporting, and bar code scanner integration. This replaced the old software with updated features, faster searching capabilities, and more informative reports.
